## Summary of Skills

### Technical Skills

- High competency in both front-end and back-end programming languages including Ruby on Rails, Javascript, Stimulus Framework, PostgreSQL, HTML, SCSS, Bootstrap and Figma.
- Experience working with databases and using SQL.
- Experience using APIs and web scraping.
- Well-versed in using Github from project-start to finish, including team projects.
- Use of Trello for a functional workflow and accurate task tracking to ensure projects are organised and tracked cleanly.
- Familiarity and experience in designing user interfaces with Figma.
- User experience with Sales, Logistics and machine Operating programs in previous roles.

### Soft Skills

- Great communication – 8 years in customer relations roles.
- Collaborative – 6 years in heavily team based roles.
- Leadership – Experience in teaching production processes and leading small teams in various roles.
- Adaptability – Utilized in covering many positions during leave cycles and changing from one role to another over short periods.
- Problem solving – Adapting to database changes throughout the project creating process, individually and in a team.
- Curiosity – Being curious to learn new things has led to a flexible nature as well as an understanding of processes from multiple angles.

## Work Experience
