Professional Summary

Ambitious, reliable and functionality first Full-Stack Developer. Looking to engage in a new team environment and apply programming skills, as well as build upon knowledge base in the interest of ongoing improvement.

Graduate of Le Wagon Coding Bootcamp, skilled in both front-end and back-end programming languages/frameworks, as well as databases to build fully functional web applications with a focus on user experience and optimal performance. Portfolio includes both team and individual projects taken from initial design to deployment, using tools to track progress and organise team workflow.

Previous work includes 8 years in sales and customer relations roles, 6 years in heavily team-based roles, experience in teaching workplace processes, leading small teams and working autonomously.

Previous employees would endorse for having a great attitude, being a hard worker, a people person and someone who is curious and eager to learn.

Top Projects

Deepwork
- A Web-app designed to help students track how they spend their study time, analyse their data for a better understanding of their studying habits and motivate them to reach a state of deep focus.
- Tech-stack: Ruby on Rails, SASS, HTML, JavaScript, PostgreSQL, Figma.

De-fit
- A Web-app built to help bring together those who are in need of a fitness space and those who have one to share.
- Tech-stack: Ruby on Rails, SASS, HTML, JavaScript, PostgreSQL, Figma.

IGNFY (I've Got News for You)
- A Web-app built for users to showcase to their friends and followers the "breaking news" that's happening in their lives.
- Tech-stack: ReactJS, Typescript, Firebase, CSS, HTML, JavaScript.

Freelance Web Development
- Design and build various websites for small start-ups as part of The RED Group initiative. The RED Group help people with disabilities start their own Micro Enterprise. I work closely with The Red Group and the enterprise founders to develop an online presence solution through building and maintaining their website. Predominantly working with WordPress, Squarespace, and Shopify CMS.
